BRIEF DESCRIPTION

Blue-green sprawling shrub bearing pairs of oval pointed leaves on reddish stems inhabiting dry rocky sites in Otago. Leaves 7.5-15.5mm long by 3.1-8.7mm wide. Leaf bud with small narrow gap between leaves at base. Flowers white or pinkish, in spikes with up to 24 flowers.

DISTRIBUTION

Endemic to South Island, apparently restricted to central Otago in the Manuherikia, Kawarau and Clutha river valleys. May be more widespread.

HABITAT

Occurs in exposed rocky outcrops and cliff faces. Often found growing in gorges.

DETAILED DESCRIPTION

Small bushy shrub growing up to 70cm tall. Inflorescences have between 4 and 12 flowers. The flowers are mauve but fade to pale pink (or almost white) after pollination.

ETYMOLOGY

veronica: Named after Saint Veronica, who gave Jesus her veil to wipe his brow as he carried the cross through Jerusalem, perhaps because the common name of this plant is 'speedwell'. The name Veronica is often believed to derive from the Latin vera 'truth' and iconica 'image', but it is actually derived from the Macedonian name Berenice which means 'bearer of victory'.

pimeleoides: Like a pimelea

faucicola: From the Latin fauces 'throat, gorge' and -cola 'dweller, inhabitant', meaning gorge dweller in reference to this plant's habitat.
