NOTABLE PLANTS

All the "special plants" of Rangiwaea Scenic Reserve also occur at Paengaroa Scenic Reserve to the south of Rangiwaea, and in some other places in the Hautapu, Upper Turakina, Rangitikei and Moawhango Valleys. Nonetheless, Rangiwaea is a northern outlier for some of these plants, and the reserve should be managed to protect and enhance such species.

The *Coprosma* species, *C.linariifolia* and *C.rubra* are localised in the North Island, and *C.virescens* is even rarer being mostly east of the main ranges.

Poa matthewsii, *Acaena juvenca* and *Schizeilema trifoliolatum* are herbs which are also local, in the west of the North Island. Ribbonwood and climbing fuchsia have only scattered locations in Wanganui Conservancy.
