

Check List Of Indigenous Vascular Plants Of Waitaanga Plateau, North Taranaki

Wanganui Plant List 109

This list is A P Druce's list of indigenous plants, No.93, with additional indigenous species indicated by:

(a) C.C. Ogle, J. Heaphy, G La Cock, B Williams from 1990 onwards [including all adventive plants not indicated otherwise]

(b) B Hartley (2000) "Plant list: Waitaanga" and "Plant list Waitaanga North" (Personal databases, for period 1998-2000)

(c) Extra plants listed by Druce as "Additions for Waitaanga State Forest: B D Clarkson, DSIR 1986". Druce's adding of these as an appendix to his list No. 93 seems to imply that these were not recorded on the Plateau, but they have been added to Wanganui Plant List 109 in the meantime.

* = adventive plants

U = uncommon on Waitaanga Plateau
